

Libby. New Feature!

Content Controls

What Are Content Controls?

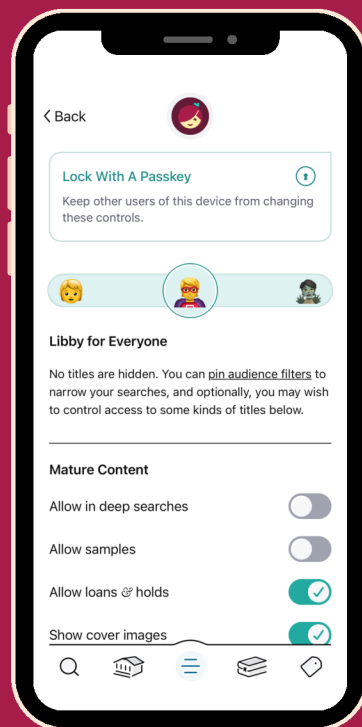

With a few simple taps, you can choose what kind of books, audiobooks, and magazines show up based on age level—whether it's kid-friendly reads, teen titles, or grown-up content.

This feature is optional. When content controls are in effect, they apply to every library in the user's Libby app.

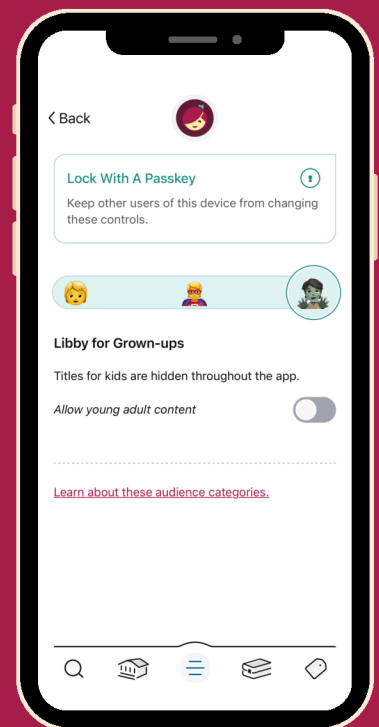

Libby For Kids

Libby for Kids shows only children's and teen titles. You can choose to limit access to teen content even further if needed.

Libby For Everyone

Libby for Everyone works just like Libby does today, with no restrictions by audience except those users manually choose to apply.

Libby For Grown-Ups

Libby for Grown-ups shows only general and mature content, hiding kids' titles. You can re-enable teen content with a simple toggle.

Content Controls & Passkeys

Users can choose to lock Content Controls with a passkey. Now a user can use an existing passkey (or create a new one) to lock their Content Controls choices on a specific device.
